## Understanding and Preventing Mood Disorders

### Exciting News!

We are very excited to share with you that the research in families has been funded by the Canadian Institutes of Health Research (CIHR) for another 5 year term - the longest possible funding term. We are so thankful for your participation in this groundbreaking research and we will be organizing to reconnect with you and your family members to launch the next chapter of research in the coming weeks. Together we have already charted the early clinical development into mood disorders and now we are aiming to understand psychobiological risk indicators

The team at Flourish Research is very happy to update all of our wonderful research participants with the news that we are getting ready to move into the next phase of our study. With this, we are planning on getting in touch with everyone come fall to have everyone who is willing in to catch up and follow up.

Thank you all for your commitment over the years to this important and informative research. With your dedication, we have established our family cohort as a recognized scientific resource that has taken decades of work together to develop.

We are looking forward to speaking to you all in the near future. If you have any questions in the meantime, do not hesitate to contact us!

WE WANT  
TO KNOW!

Do you have any comments, questions or suggestions? Is there anything you would like to see in future newsletters? We invite and welcome your feedback ☺ Please direct your responses to Arielle Weir. Thanks for reading!
